Good Afternoon Sean and Davis,

We completed coring of SC-S232 on the first attempt. We had to shift away from the location approximately 90 ft because the marked locatio was on land. Please see the attached photos for details.

Photo 1: Drilling of SC-S232. Please note that a creasote-containing piling was approximately 10 ft away.

Photo 2: It was a tight squeeze to get to this location.

Please let me know if you have any questions.

Sincerely,

Joe Guggenberger, PhD, PE

Environmental Engineer

CDM Smith
